

FEDS READY FOR DIGITAL TRANSFORMATION

Federal employees envision a unified office that allows them to collaborate seamlessly across multiple devices and locations.

47%

say they need to **collaborate daily** with colleagues stationed in other locations

52%

acknowledge needing an online connection to work **beyond their regular office space** at least once a week

27%

need to **connect outside the office** on a day-to-day basis

UNIFIED OFFICE? NOT SO FAST...

Outdated IT infrastructure and policies are creating obstacles.

27% dissatisfied

13% very dissatisfied

respondents are dissatisfied with **mobile access** provided by their agency

38%

have little to no confidence that current infrastructure can support recent **advancements in collaborative tech**

39% external security threats

52% budget limitations

top challenges faced by respondents

TELEWORK, MOBILITY GROWS IN FITS AND STARTS

Agency support for telework and mobility is growing, but still uneven.

70%

say their agency allows **telework**

37%

feel their agency prioritizes **telework-related applications**

37%

feel the issue **does not merit** the appropriate attention

THE CASE FOR THE UNIFIED OFFICE

The importance of digital transformation goes beyond policy mandates.

46%

say the technology is key to **maximizing productivity**

35%

say it **improves employee satisfaction and morale**

35%

say it **accelerates mission results**

By removing communication barriers and coordinating decision-making processes, agencies see collaborative tools as a viable way to raise workforce effectiveness.
