

CHARTING STATE & LOCAL GOVERNMENT'S OS MIGRATION JOURNEY

Many state and local organizations are streamlining their enterprise operating systems (OS), and GBC's September 2017 survey¹ reveals ongoing progress associated with OS migration.

Here's what they want in their devices:

Improved
responsiveness/speed

Better user experience

Device security

Many organizations look to up-to-date software to better enable their IT environment. With this in mind, more than *one third* of organizations have migrated to Windows 10.

However, migration barriers still exist:

Budget constraints

Interfacing
legacy applications

Insufficient IT personnel

What can state & local organizations do to achieve OS migration success?

Respondents have a few ideas:

Implement effective
change management

Recruit and retain
IT personnel

Ensure the appropriate
hardware is in place

About Intel

In today's data-dependent world, government agencies must work smarter and faster to keep up with citizens expectations. Solutions built on Intel® processors speed time to insight efficiently and cost-effectively while enhancing security and reliability. Modern IT solutions give government IT teams additional flexibility and scalability to support an increasingly mobile workforce, respond faster to citizen's needs, and drive ongoing innovation and success in the future.

Methodology

Government Business Council and Lenovo released a survey on September 13, 2017 to a random sample of state and local government leaders. Of the 262 qualified respondents who completed the survey, 85% make final procurement decisions in the decision-making process, 30% are members of agency leadership, and 82% are salaried managers or executive managers.
