

Aaron Potler, Distinguished Engineer, IBM U.S. Federal

Aaron Potler focuses on High Performance Computing including microprocessor and computer architectures as well as application performance. He works with IBM Research and product development teams to develop feature and function proposals for processor and system designs. Aaron's experience includes developing software for high-performance libraries in support of applications and new code generation and optimizations in compilers. He collaborates with clients and guides them on architectural decisions and technical strategies. Aaron holds a Bachelor of Science in Computer Science and Mathematics from the University of Maryland, and a Master of Science in Computer Science from the Johns Hopkins University.
