

Alec Bogdanoff, Ph.D. is a policy-trained oceanographer and meteorologist, specializing in science communication. He is the President and Co-Founder of Brizaga, an engineering consulting company focused on identifying and effectively communicating flood risk, including sea level rise, and assisting to reduce that risk. Alec also serves as the Florida Resilience Manager for the American Flood Coalition. He has addressed Congress and the Florida legislature on the financial implications of rising seas. Alec holds a Ph.D. in physical oceanography from Massachusetts Institute of Technology and the Woods Hole Oceanographic Institution, and M.S. and B.S. degrees in Meteorology from Florida State. He also served as a Sea Grant Fellow for a U.S. Senator on Capitol Hill.
