Edie Punt is a cartographer, author, mother-runner, and textile artist with over twenty-five years of experience in the areas of map design and production, generalization, and cartographic software user experience.

She holds a Bachelor of Science degree in Physical Geography and Northern Studies from McGill University, and a diploma in Cartography from the College of Geographic Sciences. She was the recipient of the 1996 National Geographic Society Award in Cartography.

Edie joined Esri in 1996 after a short period of making maps for a variety of Canadian federal agencies including the Department of Fisheries and Oceans, Environment Canada, Statistics Canada, Agriculture Canada, Natural Resources Canada, and the National Atlas of Canada. She has served on the board of the Canadian Cartographic Society.

At Esri, Edie is the lead author and product engineer for mapping in ArcGIS Pro, focusing on symbology, symbols, and styles. She is the co-author (with David Rumsey) and designer of *Cartographica Extraordinaire, The Historical Map Transformed* (Esri Press 2004) and a co-author and instructor of Esri's popular *Cartography* MOOC.
