

Brian R. Gattoni is Chief Technology Officer for the Cybersecurity and Infrastructure Security Agency (CISA), where he is responsible for the technical vision and strategic alignment of CISA data and mission services to manage risk to federal networks and critical infrastructure. CISA works with partners to defend against today's threats and collaborating to build more secure and resilient infrastructure for the future.

Previously, Gattoni was the Chief of Mission Engineering and Technology, responsible for developing innovative analytic techniques and new approaches to technology insertion to increase the value of DHS cyber mission capabilities. In 2015, Gattoni was named DHS Systems Engineer of the Year.

Prior to joining DHS in 2010, Gattoni served in various positions at the Defense Information Systems Agency and the United States Army Test and Evaluation Command.

Gattoni holds a Master of Science in cyber systems and operations planning from the Naval Postgraduate School in Monterey, California, and is a Certified Information Systems Security Professional (CISSP).
