

Brian McConnell is the Practice Manager at CDW Government, for any Application-Related initiatives; from DevOps, Custom Development, Performance, and Modernization. With 30 years as an experienced IT professional he is currently responsible for driving Application Modernization efforts at CDW-G. Brian has decades of development experience with what are now known as the “Legacy” application technologies; COBOL, RPG, FORTRAN, etc. Having this technical background places Brian in an advantageous position to help our Federal Government with tactical and strategic Application Modernization efforts.
