

Lucid for public sector

We help government teams and contractors standardize on one platform for intelligent diagramming, virtual whiteboarding, and cloud infrastructure visualization.

Advantages of the Lucid Visual Collaboration Platform:

- Consolidate tools with one trusted vendor in a secure FedRAMP environment
- Make decisions and innovate faster
- Align your team with a single source of truth

Lucid is FedRAMP In Process

Increase security and efficiency for government projects

Mission-ready security:

- Trusted by federal, state, and local government agencies and contractors: FedRAMP Moderate impact level
- Complies with NIST CSF, NIST SP 800-171, FIPS 140-2, and DFARS 252.204-7012
- U.S.-based, U.S.-person managed service built on AWS GovCloud infrastructure
- Used by U.S. DoD agencies and contractors for defense, ITAR, and other controlled information

Governance:

- Manage sharing for folders and documents
- Restrict access only to allowed IPs or domains
- Customize security configurations
- Key Management Service (KMS)
- Security configurations, including document retention, data restoration, and data deletion

FedRAMP integrations currently available:

Lucidchart

- Confluence Data Center
- Jira Data Center

Lucidspark

- Jira Data Center Cards
- Jira Data Center
- Cards for Jira Cloud

Lucidscale

- AWS import
- Azure import
- GCP import

FedRAMP migration

Lucid offers support for FedRAMP account migration, ensuring that existing documentation is carried over to your new FedRAMP account with sharing permissions, folder structure, and other settings intact. [Click here](#) for the full service description.

FedRAMP implementation

With your FedRAMP license purchase, you qualify for implementation services that include a best-in-class, guided onboarding designed to provide you with the tools and best practices you need to realize value quickly.

About Lucid

Purpose-built products to power every stage of work

 **Lucidchart**  **Lucidspark**

Intelligent diagramming

Virtual whiteboarding

We also offer specialties to support specific use cases:

 **Lucidscale**

Cloud visualization

How government teams and contractors use Lucid GovSuite to reach mission-critical objectives.

Accelerate digital transformation

A national government research agency uses Lucid GovSuite to **digitize, streamline, and document core processes**. After transitioning to a hybrid workforce, they needed an application that would support secure, digital collaboration without a steep learning curve.

With advanced collaboration features and professional service partners, Lucid has transformed the agency's quarterly planning to address the needs of remote teams **while increasing agility and innovation**.

Improve compliance

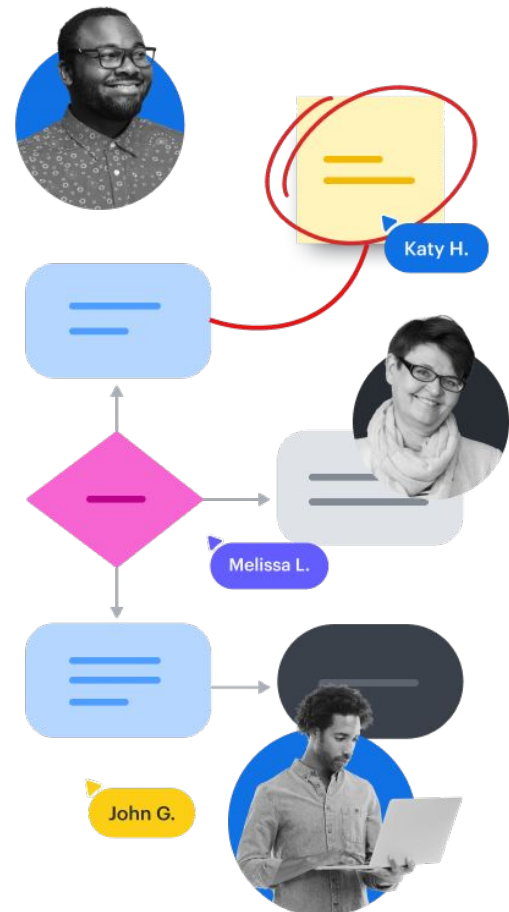

A rapidly scaling defense contractor needed a way to **innovate faster while ensuring their tech stack was FedRAMP compliant**, as their scope expanded and their data requirements shifted in parallel. Given the increased sensitivity of their data, they required an environment with more stringent controls in place.

Using Lucid GovSuite, the contractor was able to **mitigate compliance risk while improving collaboration** among their fully remote and hybrid teams. Compliance and risk mitigation can increase the competitiveness of offerings for government contracts and assure authorizing officials of security competence.

Collaborate securely

A U.S. Military's digital directorate is **collaborating with confidence** using Lucid GovSuite, ensuring they have appropriate safeguards and controls in place for their data.

Teams have used Lucid to continue agile software delivery when working remotely, **visualize and streamline processes**, and, ultimately, **improve developer efficiency**.
