

Chris Betz Bio:

Director, EUC Technology Strategist Tech Pursuit team out of the VMware OCTO.

Chris lives in Manitou Springs Colorado at the Base of Pikes Peak with his beautiful wife Sarah where they like to hike, backpack, go camping, snowshoeing, snowboarding and really anything to do with the mountains. All this is accessible right out their front door, he loves living in the mountains!

Chris recently came back to VMware from Dell Technologies where he was the account CTO managing large multi-cloud architectures and enabling large enterprise solutions to empower End User Computing. This was accomplished by working with VMware as a subsidiary to Dell Technologies. Prior to Dell Technologies, he was the lead engineer for the VMware Army team and also served several years in the End User Computing business unit assisting our technologies to align with Public Sector and Private Sector customers. In total, Chris has spent the last 9yrs working with VMware. He has also spent 13yrs with a federal systems integrator where he was a lead field engineer\architect designing, implementing, and operationalizing Citrix, Microsoft SCCM, Directory services among other large enterprise systems to enable the business. At the very beginning of his career, he spent 8yrs in the Army as a Signal Support Systems specialist managing and deploying LAN\WAN, AM\FM and Tactical Satellite communications systems enabling the warfighter and supporting my peers down range. In total Chris has been in the IT industry for 27yrs and still learns every day!

What gets him up in the mornings is a good cup of coffee, the love of his beautiful family and supporting VMware customers!
