Professional Experience

Christopher Porter is the Manager of FireEye's Horizons team, which conducts strategic forecasting to anticipate risks posed by emerging technologies and geopolitical developments, helping clients and the public better assess their exposure to a dynamic cyber threat landscape.

His research interests include the use of geopolitical analysis to anticipate cyber attacks, the role of cyber operations in grand national strategy, counterdeception and attribution, and the dark web.

Prior to joining FireEye, Christopher served nearly nine years in operations and analysis at the Central Intelligence Agency, where he won the National Intelligence Analysis Award medal, coauthored a National Intelligence Estimate, and was the first analyst to win the Cyber Threats Group Director's Award for Innovation.

Christopher's work at CIA included assignments as the White House National Security Council and West Wing briefer for cyber threat intelligence, as the Directorate of Operations representative to the Scientific and Technical Intelligence Committee, to numerous public-private intelligence cooperation organizations, and in warzones.

Education

- Masters of Science, Decision and Information Science – University of Florida
- Bachelors of Science, Economics – University of Florida
