

Corry Robb is the Product Design Lead in the Office of GEOINT Service at the National Geospatial-Intelligence Agency (NGA). Corry previously led the Military Exploitation of Reconnaissance and Intelligence Technology (MERIT) Program Office and the Advanced Operations Office at NGA, focusing on the delivery of cutting edge capabilities to military and intelligence customers. Prior to NGA, Corry supported the homeland security mission as a Special Assistant to the Assistant Secretary of Immigration and Customs Enforcement (ICE) and worked directly for both Secretaries Chertoff and Napolitano at DHS Headquarters.

Corry previously co-founded and ran a 501(c)(3) non-profit organization, IDEAA, that actively worked to diversify software design and development through exposing underserved communities to coding.

Corry holds a Bachelor of Science degree in Political Science from Kent State University and a Master's Degree in Geospatial Intelligence from Penn State University.

Corry is a resident of Alexandria, VA where he lives with his family.
