

Dave Vennergrund is the vice president of AI and Data Insights at GDIT. He leads the company's AI and Data Insights consulting practice, which focuses on AI/ML, cloud native analytics, data science and modern data management. He is passionate about applying AI/ML, natural language processing, computer vision, data analytics and predictive analytics to missions across federal civilian, defense, intelligence, and homeland security sectors. He was recently selected by the Washington Executive as one of the Top AI Execs to Watch in 2023.
