

**Esteban Rubens, Healthcare AI Principal, NetApp**

Esteban has been in the IT industry for over 20 years, going from startups to Healthcare IT where he worked in Enterprise Imaging and AI. At NetApp he's responsible for the Healthcare AI practice, helping create solutions that improve patient care and reduce provider burnout, informed by the Quadruple Aim. He's a visible participant in the AI-in-Healthcare conversation, with a focus on the translation of AI research into clinical practice.
