

Dr. Monica Farah-Stapleton

Chief Engineer, Defense Healthcare Management System Modernization (DHMSM)

Dr. Farah-Stapleton supports the Department of Defense's (DoD) Health Information Technology initiatives for MHS GENESIS, as well as data interoperability between the DoD and public and private sector partners. Previous DoD assignments focused on integrated C4ISR systems of systems activities. She holds Acquisition Professional Level III certifications in program management and systems engineering, and earned a PhD in Software Engineering from the Naval Postgraduate School, an ExMSE from University of Pennsylvania, and a BSEE from Rutgers University.
