Keith Brooks is Director and Head of Technical Business Development for AWS Government Regions at Amazon Web Services. At AWS, Keith helps enterprises, public sector organizations, technology companies and startups build and operate hyperscale capabilities on the AWS Cloud. In his specific role he is responsible for strategy, GTM, partnerships, and adoption of restricted access AWS infrastructure and services regions.

A recognized technologist and business leader, Keith has more than a decade of experience defining, developing and bringing to market new concepts, products and technologies across industry, Government and international sectors. Prior to joining AWS he spent 8 years in global strategy and management consulting and several years as a software engineer developing business and mission critical software systems at Fortune 100 companies in the Aerospace/Defense and Industrial Chemicals sectors.
