

## Max Everett

### *Chief Information Officer*

Max Everett has served as Chief Information Officer (CIO) for the U.S. Department of Energy (DOE) since July 2017. As CIO, he oversees the Department's information technology (IT) portfolio and cybersecurity efforts, serves as an advisor to the Secretary and Deputy Secretary, and manages the various functions of the Office of the Chief Information Officer. Mr. Everett leads DOE's efforts to modernize the Department's IT infrastructure and migrate systems to the cloud, including one of the first Technology Modernization Fund projects to accelerate the adoption of cloud email across the enterprise. As a part of his overall efforts to implement an enterprise risk management framework for

cybersecurity, he led the build-out of DOE's cloud-based cyber data and analytics platform, which supports visibility throughout the Department and across a range of DOE's activities with the Energy Sector.

Mr. Everett has extensive experience in managing and implementing IT and cybersecurity. He has previously worked as a consultant for public and private sector organizations, where he conducted risk assessments, and also developed secure infrastructures, network security services, cloud security policies, and cyber information sharing programs. Mr. Everett has also held a variety of technology leadership roles at the White House, the Department of Commerce, and on several National Special Security Events.

Mr. Everett has a B.A. from the University of Texas, a J.D. from the University of Houston Law Center, and is a member of the State Bar of Texas. His professional certifications include Certified Information Systems Security Professional (CISSP), Certified Ethical Hacker (CEH), and Project Management Professional (PMP).
