---

Pam Dill is a Senior Security Advisor in the WW Security & Analytics Practice for HP and has extensive experience in security compliance and governance as well as secure configuration and management of hardware and software solutions. She has advised and collaborated with Enterprise businesses and the US Government including the Department of Defense for over 25 years. Pam has been instrumental in driving advances in HP's security including Common Access Card (CAC) PKI and Secret Internet Protocol Router Network (SIPRnet) Token authentication capabilities on devices. She has written whitepapers for remediation guidance based on DISA Security Technical Implementation Guide, as well as Smartcard Authentication Configuration. Pam holds a BS and MS in Management Information Systems from Columbia and Florida Institute of Technology respectively. She is an ISO 27001 Lead Auditor, EC-Council Certified Ethical Hacker and Network Defense Architect.
