

Tracy has been with Google for over 7 years, and has worked with a number of teams, including Cloud AI, Android | Chrome | Education (ACE), Google for Education, Google Offers, and Solve for X. Before joining Google she has worked at multiple early-stage tech startups where she held multiple functions including product management, developer relations, product marketing, business development and strategy. Prior to her life in tech she has taught children traditional wilderness survival skills (things like friction/matchless fire, animal tracking, debris hut shelters, etc.), taught in a traditional classroom, studied private reserves in Costa Rica and has been a professional hip hop dancer. Tracy graduated *magna cum laude* from Harvard University with joint degrees in Studies of Women, Gender & Sexuality and Psychology and received an MBA from the Stanford Graduate School of Business. She is a mother of 2, married to another Alphabet-er, and in her spare time loves being outside with her family, cooking, hiking and attempting the Sunday crossword.
