

## George Kamis

Chief Technology Officer, Global Governments and Critical Infrastructure

George Kamis is the Chief Technology Officer (CTO), Global Governments and Critical Infrastructure at Forcepoint. He works closely with Information Assurance and Cyber Security industry leaders, government executives, and Forcepoint executive management team to help guide their long-term technology strategy and keeps it aligned with federal and industry requirements. By leveraging his wealth of over 30 years of experience in Cyber Security, he has helped lead Forcepoint to become the leader in Cross Domain Solutions (CDS) and cyber security products.

Prior to his role as CTO, he served as Vice President of Engineering for 10 years at Trusted Computer Solutions and ran both the Professional Services and Development organizations. Raytheon acquired Trusted Computer Solutions in 2010. Trusted Computer Solutions, along with other Raytheon acquisitions, formed as Forcepoint in January 2016

Prior to Trusted Computer Solutions, Mr. Kamis worked for the US Naval Research Laboratory, Center for High Assurance Computer Systems. In this role, he managed the development of multilevel secure systems for the Navy and lead one of the first multilevel system to be deployed in the Navy. He was also involved with the testing and deployment of US Navy communication security (COMSEC) devices.

Mr. Kamis is also an active member of the Technology Committee and Supervisory Committee for the Fairfax County Federal Credit Union and consults on information technology and cyber security related matters.

He holds a degree in Electrical Engineering with honors from West Virginia University and holds active memberships Armed Forces Communications and Electronics Association (AFCEA).
