

GREG CLIFTON

Greg Clifton

Title: General Manager - Defense & National Security Group

Greg Clifton is General Manager for the Defense & National Security Group at Intel Corporation. Greg has been working with the DOD and Intelligence Community sectors for the last 20 years to help them identify and understand how Intel based technologies and solutions can enable them to achieve their Mission. Greg collaborates extensively with various Intel Business Units, Technology company partners, and Systems Integrators on a technical and business level to help find and maximize the intersection between the customer's Mission and Intel's Technology and Business priorities. Key focus areas include: HPC, Cloud, AI, Edge, Cyber, and Client computing.

Greg works closely with his military customers and Intel's technical experts to ensure system readiness by securing a variety of advanced systems, including sensors, vehicles, planes, naval platforms and unmanned systems. Greg also collaborates with the DoD's scientific and procurement professionals to understand how AI and advanced sensing can be leveraged for Intelligence, Surveillance and Reconnaissance (ISR). This architecture enables inference and analysis at the edge while still leveraging the cloud and the data center to analyze results and trends at scale.

Greg has 25 years of Sales and Business Development experience. He joined Intel in 2000 as part of Intel Online Services and managed the Mid-Atlantic and Greater NY/NJ District. He joined Intel's Business Development Organization in late 2002. Prior to joining Intel, Greg was a Regional Sales Manager for UUNET Technologies in their Web Hosting Division. Greg is a graduate of Virginia Tech.
