When Data Clicks, Knowledge Flows

InQusient is helping enterprise organizations bring harmony to their complex corporate data matrix with a smart and systematic flow of information facilitated by a data driven and user-integrated platform for the relational foundation. InQusient transforms enterprise knowledge into a configurable highway of information tailored to the business model, the manner in which the data is used and the transparency of information required by departments.

InQusient Platform gives database users visibility and real-time accuracy so they can make informed decisions. By doing so, they can easily connect the dots to facilitate the flow of knowledge so the right people get the right information at the right time.

How It Works

LAUNCH

Leverage an industry-standard database that provides the scalability, information assurance, openness and the rigor of a relational foundation.

CONFIGURE

Starting from a host of built-in browser-based features, end users can configure attributes, forms, reports and role-relevant visibility in a direct fashion, staying up-to-date with the organization's data capture and management needs.

SHARE

Users contribute information to enterprise knowledge that immediately becomes visible across operational departments based on accessibility settings.

The InQusient Platform adds a host of browser-based features that facilitate all-encompassing functionality, **from the simplest individual information collection activity to an enterprise-wide line of business systems.**

InQusient puts it ALL at your fingertips so you can get up-to-date enterprise level perspective and share data across operations and departments at the speed of your mission.

Streamlined data management at the speed of your mission using the latest technology and user-driven customization for:

← Reports

← Search

← Audit Trail

← Tasking

← Dashboards

← Discussion Threads
