

**Isaac Zaworski, Vice President, Vricon**

Mr. Zaworski joined Vricon on January 1, 2015 as the first employee of Vricon Systems, LLC. He serves as the Vice President of Business Development and is responsible for introducing Vricon's disruptive 3D modeling capabilities into the US DoD and IC communities. Mr. Zaworski is an engineer by trade, with bachelor's and master's degrees in mechanical engineering from Cornell University, and worked as the CTO at Urban Robotics. Mr. Zaworski also has spent significant time overseas, in tactical environments, working on developing new tools and methodologies to overcome challenges related to Processing, Exploitation, and Dissemination (PED) of massive 2D and 3D imagery data sets. In this role, he was instrumental in demonstrating and teaching the use these new tools and methodologies to the warfighter.
