

J. Wolfgang Goerlich is an Advisory CISO for Cisco Secure. Prior to this role, he led IT and IT security in the healthcare and financial services verticals. Wolfgang has held VP positions at several consulting firms, leading advisory and assessment practices. He is an active part of the security community, co-founding and organizing security conferences and events. Wolfgang regularly advises on and presents on the topics of security architecture and design, identity and access management, data governance, secure development life cycles, zero-trust security, and more.
