Jack McCarthy
CIO
New Jersey Courts

Since October, 2012, Jack McCarthy has been responsible for establishing strategies and direction for information technology, working in close collaboration with judges, managers, staff, attorneys, litigants, and the public. He began his career with the Judiciary as a probation officer, worked as a business analyst on the judiciary statewide case management systems, worked as a network analyst, led the state's Information Technology Security Division, and led the judiciary business analysis unit prior to his appointment as Judiciary CIO.
