

Justin DePalmo is the Vice President, Chief Information Security Officer for General Dynamics Information Technology (GDIT), a business unit of General Dynamics.

DePalmo has more than 15 years of cybersecurity experience in the aerospace and defense industry before joining GDIT in 2022. Previously, DePalmo served General Dynamics Ordnance and Tactical Systems, another business unit of General Dynamics, as its CISO. He was responsible for leading the company's cybersecurity strategy and implementing and managing cybersecurity controls, including security technology for the entire organization. He also oversaw the organization's cybersecurity, cyber engineering, and cyber operations teams. DePalmo also served as a cybersecurity subject matter specialist for the General Dynamics internal audit program in 2018-2019 and is a current member of the company's cyber council.

DePalmo holds a bachelor's degree in information technology management and an associate's degree in computer applications from American Public University. He actively participates on several threat intelligence and information sharing platforms across the defense industrial base community and sits on external panels addressing cybersecurity best practices across the public sector.
