

## John Simms

Senior Technical Advisor, Office of the Chief Technology Officer

John Simms is an information security leader and advisor with over 25 years of information technology and security experience. John currently supports the Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency's Office of the Chief Technology Officer, primarily supporting the Trusted Internet Connection program and the agency's cloud strategy. Previously, John served as the Chief of Cybersecurity Assurance and as the Continuous Diagnostics and Mitigation (CDM) Program Manager in the Federal Network Resilience Division at DHS. Since 2016, John has focused on high value asset security architecture and engineering, and cloud modernization. Prior to joining the DHS, John served as the Chief Information Security Officer (CISO) at the U.S. Food and Drug Administration.
