

Joshua Stultz serves as Senior Cloud Architect and oversees operations and security for the Cloud Services team within the National Institutes of Health (NIH) Center for Information Technology (CIT). In this role, he is responsible for enabling secure access to cloud computing resources across NIH and in support of NIH-funded researchers via the NIH STRIDES Initiative. Joshua previously worked at NIH's National Heart Lung and Blood Institute (NHLBI), where he led IT operations and oversaw the migration of numerous enterprise applications to the cloud. Joshua has always considered himself to be a technologist and has diligently looked for better and more secure ways to use technology.
