

Mr. Rob Joyce is the Senior Advisor for Cybersecurity Strategy to the Director of the National Security Agency (NSA). Rob has worked at NSA since 1989, holding various leadership positions within both focus areas of NSA: the Cybersecurity and Signals Intelligence missions.

His previous assignment was Special Assistant to the President and Cybersecurity Coordinator at the White House where he led the development of national and international cybersecurity strategy and policy for the United States and oversaw implementation of those policies.

From 2013 to 2017, Rob served as the Chief of Tailored Access Operations (TAO), the NSA's mission element that provided tools and expertise in computer network exploitation to deliver foreign intelligence. Prior to becoming the Chief of TAO, Rob served as the Deputy Director of the Information Assurance Directorate (IAD) at NSA, where he led efforts to harden, protect and defend the Nation's most critical National Security systems and improve cybersecurity for the nation.
