

Julius Chang, Federal Program Lead, System and Support Services Division,  
GrantSolutions.gov, Department of Health and Human Services

Julius has been delivering sophisticated IT solutions to meet public sector infrastructure, security, and data management needs for more than 15 years. He began his career improving state government IT services at the University of Maryland before working at USDA and FDIC.

At GrantSolutions.gov Julius is currently leading the development of GrantSolutions PROS framework. Providing agencies automated tools to collect program management outcome data and report on broad program performance metrics over the life of a grant. This data is used to help improve program evaluation and future grant award decisions through predictive analytics.
