

Kevin E. Greene is an experienced leader, champion and advocate for advancing the state of practice in cybersecurity. He has successfully led multiple federally funded R&D projects in his career that were commercialized and transitioned into practice.

Kevin is currently the Public Sector CTO for OpenText Cybersecurity. Leveraging his innovative and strategic expertise, he drives customer engagement around cyber capabilities in federal agencies for digital transformation, software supply chain, zero trust and evolving threat defense.

Prior to joining OpenText, he worked at the MITRE Corporation supporting DevSecOps and cyber defense initiatives. Kevin also spent time serving our nation as a federal employee at the Department of Homeland Security, Science and Technology Directorate, Cyber Security division.

He holds a Master of Science and Bachelor of Science in Information Systems from the New Jersey Institute of Technology and supports several external advisory boards in formalizing cybersecurity curriculum and initiatives.
