

Richard Butgereit has served for the past 10 years as the Geographic Information Systems (GIS) Administrator and Chief Information Officer for the Florida Division of Emergency Management and the Florida State Emergency Response Team managing GIS applications, databases, web applications, and mobile applications. Mr. Butgereit has over 20 years' experience applying GIS technologies to natural resources protection and emergency management programs. He serves as State of Florida's representative and on the Board of Directors to National States Geographic Information Council and is active in that council's Geospatial Preparedness Committee. He also serves on DHS S&T First Responders Resource Group, National Information Sharing Consortium Board of Directors, member Florida HAZUS User Group, National Alliance for Public Safety Executive Leadership Team, FEMA Technical Mapping Advisory Council, and as a National Integration Center Strategic Resource. Richard is a graduate of New College, the Honors College of the State University System of Florida, and is a Geographic Information Systems Professional.
