

Ron Fuller is a Staff Engineer in the Network and Security Business Unit (NSBU) focused on NSX for VMware. He has 22 years of experience in the industry and has held certifications from VMware, Novell, HP, Microsoft, ISC2, SNIA, and Cisco including two CCIEs No. 5851 (Routing and Switching/Storage Networking). His focus is working with customers to address their challenges with comprehensive end-to-end Data Center architectures and how they can best utilize VMware technology to their advantage. He is also the co-author of the VMware Press NSX Fundamentals LiveLesson video series.
