

Mr. Korie Seville

*Cloud Infrastructure Architect, Hosting and Compute Center,
Defense Information Systems Agency, Department of Defense*

Mr. Korie Seville serves as a cloud infrastructure architect with the Defense Information Systems Agency's (DISA) Hosting and Compute Center (HaCC). As a member of the HaCC he is responsible for architecting and integrating commercial cloud hosted solutions into the DoD network infrastructure.

Before joining the HaCC, Mr. Seville worked as a DISA contractor serving as the network architect for the Secure Cloud Computing Architecture (SCCA) program. He was previously a network engineer and security consultant for multiple private sector industries, including Tapestry Technologies, Inc. and Collections marketing Center, Inc.

Mr. Seville received a bachelors of computer science from the Shippensburg University of Pennsylvania.
