

As Solution Integration Director, Mr. Lance Scott focuses on the FEHRM's joint efforts, maximizing resources and improving collaboration on the joint health information exchange, HealthIntent, Joint Legacy Viewer and other priorities. He manages joint requirements to create joint architecture and use cases, while synchronizing change requests, service requests and releases. Mr. Scott also oversees the adoption of information models and standards while tracking joint decisions. Previously, he served as a Project Manager for the DOD Defense Medical Information Exchange.
