

Laurie Andreola is a tech industry veteran of more than 18 years. She spent more than a decade at Pfizer, serving as a technical Senior Manager and leading a team responsible for Dev Ops, Agile, Scrum and Infrastructure automation using VMware vRealize Suite, as well as acting as the Lead Architect for an enterprise migration to VMware Cloud on AWS (VMC) from legacy OVHCloud.

This included working with VMware to architect the solution and update vRealize to allow automated provisioning to VMC. Laurie has recently joined Amazon Web Services (AWS) public sector team to lead a team of Hybrid/Edge Specialist Solutions Architects for the Americas.
