

Lieutenant Colonel Maximilien H. Reele is a Materiel Leader within the Program Executive Office, Digital Directorate. He is currently the Chief of Kessel Run's (AFLCMC/HBB) All Domain Common Platform (ADCP) Branch. He manages the daily operations and associated business lines of effort for hosting and servicing command and control mission systems, encompassing over 60 internal and external application teams. Kessel Run's mission is to deliver and operate war-winning software that enables operation of a truly continuous air campaign via dynamic tasking integrated across the base, wing, and operation center levels. The acquisition, product, and technology innovation that emerges from Kessel Run is used to set new baselines and policy for the Department of Defense's digital transformation.

Lt Col Reele received his commission from the United States Air Force Academy. He has served as a weapons and tactics analyst, space & cyber system technology manager, segment lead for the Geosynchronous Space Situational Awareness Program (GSSAP) and as the Product Owner for Kessel Run's original cloud-architecture and scaling. He has also served in the Pentagon on the Assistant Secretary for Acquisition Staff for a variety of space technology portfolios. Most recently, he was as a founder and Chief of Delivery for the Business and Enterprise System Product Innovation (BESPIN) organization and software lab.

Lt Col Reele has deployment experience as a precision guided munitions expert and government quality assurance evaluator in Southwest Asia in Operations IRAQI FREEDOM and ENDURING FREEDOM.
