Lisa Lorenzin is Director of Transformation Strategy at Zscaler, specializing in secure application access and digital transformation. For more than 20 years, she has worked in a variety of network and information security roles and has contributed to open standards for endpoint integrity and network security from the Trusted Computing Group (TCG) and Internet Engineering Task Force (IETF).

Lisa's current focus is on helping customers achieve their security goals and create a seamless user experience across cloud and mobile environments through the use of cloud-delivered zero trust access solutions.
