

Lloyd Granville; Deputy CTO, Department of Defense

Lloyd works as part of a team of Deputy CTOs within NetApp's Global Strategy and Technology Office. Supporting NetApp's U.S. Public Sector division, he is responsible for developing CIO/CTO/Director level strategies, solution architectures, and supporting partner initiatives for customers across the Department of Defense. His activities result in secure and scalable Data Services for hybrid cloud or traditional & non-traditional IT environments that enhance the warfighter's ability to execute challenging missions. He has deep technical knowledge of Public Sector Infrastructures, especially within the DoD. Before his role as our CTO for the Department of Defense, Lloyd retired as an Army Chief Warrant Officer 4, serving 23 years on active duty, designing, implementing, and managing IT enterprise architectures that supported many efforts from Military Intelligence to Special Operations missions throughout his Army career.
