

Martin Rieger, who has over two decades of experience in information systems and technology, serves as chief solutions officer of cloud solutions provider stackArmor. In the role, Rieger leads the company's solutions team and manages technology investments focused on the critical needs of cloud service providers and independent software vendors looking for security and compliance services.

stackArmor's services support companies that need to comply with the Department of Defense's Cybersecurity Maturity Model Certification program, the Federal Risk and Authorization Management Program and the Defense Federal Acquisition Regulation Supplement, among others. Mr. Rieger has served in leadership roles in the area of cloud, security and compliance with various organizations such as Penguin Computing, Emagine IT, CACI International, where he supported the U.S. Naval Personnel Command.

Mr. Rieger joined the private sector in 2009 after 10 years in the U.S. Navy as a technician focused on information systems. He also holds a bachelor's degree in information systems security and a master's degree in information systems management from American Sentinel University, Denver. Additionally, Mr. Rieger is a graduate of James Madison University with a Master of Business Administration degree focused on information security.
