

Mary Lou Prevost
Vice President, State and Local Government and
Education, US
CA Technologies

Mary Lou Prevost is the Vice President for U.S. state and local government and public education programs at CA Technologies. She and her team partner with governments across the country helping them leverage technology to improve how the public interacts with government. A key focus has been working extensively with the partner community to achieve outcomes for our clients that we could not do alone.

She spent the last 18 years focused on government. She was instrumental in starting CA's Public Sector State, Local, and Education (SLED) vertical. She was the first SLED Director, overseeing the Western half of the country and now has responsibility for CA's entire SLED business across the US.

Mary Lou is the Chair of Executive Council for the Information Technology Alliance for Public Sector SLED (ITAPS). ITAPS, a division of ITI, represents a diverse set of commercial and public-sector companies within the IT industry on a wide range of policy and procurement issues. She sits on the National Association of State CIO (NASCIO) CLC committee. She recently joined the Board for the Texas Technology Consortium (TTC). TTC is a statewide association that brings together corporate, nonprofit, academic and legislative leaders to assist in developing legislation that will ensure a robust and efficient business environment for technology-driven firms.

Mary Lou holds a Bachelor of Science degree from California Polytechnic State University – San Luis Obispo. She lives in Austin, Texas with her husband and three children.
