

Matthew Marsden, CISSP, is the Vice President of Technical Account Management, Public Sector for Tanium with more than two decades of experience supporting cybersecurity innovation in the government space – including 18 years in the U.S. Navy. As a visionary executive leader, Marsden works to create and maintain strong collaboration across the organization to achieve efficiencies, identify opportunities, and model the company's core business goals and values to align with customers' mission-critical needs. Marsden is also a fellow for the Institute for Critical Infrastructure Technology where he shares his expertise with legislative, public, and private sector community members by engaging in various nonpartisan research publications, briefings, and events.
