

Michael Moore is the Information Security Officer for the Maricopa County Recorder's office. Maricopa County is the fourth most populous county and the second largest voting district in the United States.

He has a passion for public service, and has worked at Maricopa County for 12 years, focusing on Information Security for the past six. In his prior role, he specialized in performing security assessments including several specifically focused on the Recorder's office. This insight into the Recorder and Election environments allowed him to hit the ground running and immediately begin designing a security program customized for his department with the goal of providing the most secure elections possible.

Michael believes it is only through effective federal, state, and local government partnerships, and assistance from our trusted vendors that we can protect our democracy and fulfill our duty to the American voter. He is currently participating in an Election Security Incident Response Task Force with the Arizona Secretary of State and other Arizona counties to develop election security response plans for counties throughout the State. Previously, he has spoken on election security at the National Association of Counties annual conference and presented at the Arizona Counter Terrorism Information Center.

Michael is an alumnus of Arizona State University with a B.S. in Mathematics and a B.A. in Education and is a CISSP.
