

Owen Rodgers leads the AT&T Federal Technology Office, whose network engineers and architects assist clients in defining and deploying their IT vision. A 24-year telecommunications industry veteran, Owen Rodgers has served in operations, systems engineering, and account management roles during his career. His AT&T Federal Technology Office team provides public sector agencies with strategic solutions encompassing wireline networks, 5G mobile communications, cybersecurity, and unified communications. The AT&T FTO also engages with executive and legislative leadership to ensure alignment between public policy and technology in the field.
