

Chief Information Officer & VP of Emerging Technologies

Patrick Foxhoven is an experienced and innovative managed security entrepreneur and technologist, having spent 20 years building secure and scalable Internet-enabled networks while co-authoring three books on information security and receiving multiple patents. He is currently Chief Information Officer & Vice President of Emerging Technologies at Zscaler.

Prior to joining Zscaler in 2010, he was a founder and CIO of CentraComm, a leading managed IT security and services provider, and served earlier as an owner and principal network engineer of Friendly Net, an early residential ISP in the midwest United States.
