

# CDW'S FEDERAL CHIEF TECHNOLOGY OFFICER

Your **Federal Chief Technology Officer for Department of Defense and Intelligence** provides select customers consultative and advisory expertise across a full range of technical aptitudes. Your FED-CTO will assess the business drivers for a given initiative and translate them into qualifiable, quantifiable and tactical solutions that spans across the CDW's solution portfolio.

Whether you're modernizing a traditional data center, considering cloud services, automating code deployments, switching to cloud-native agile development methodologies, addressing availability and disaster recovery, or integrating technology stacks between disparate companies or lines of business, we can help.

We are technology thought leaders that aim to better understand the problems you are facing through a consultative approach in engagement. We seek to help your business in navigating the ever-changing technology landscape to better leverage resources and infrastructure in achieving quantifiably results.

## THE FEDERAL CHIEF TECHNOLOGY OFFICER:

- Provides recommendations pertaining to key objectives in which cutting edge technical solutions solve a given challenge.
- Illustrates the alignment (or misalignment) between strategic goals and key business decisions regarding products and services; partners and suppliers; organizational requirements and capabilities; and key business and IT initiatives.
- Works to develop an integrated view of the business by making technical recommendations pertaining to information gleaned from client engagements as well as solve problems by analyzing requirements and evaluating alternatives.

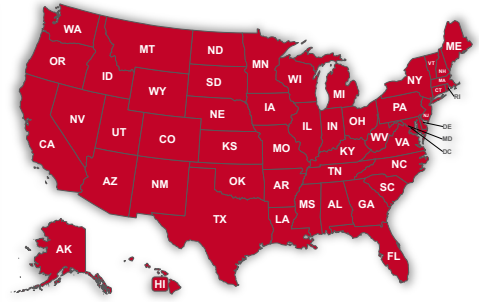

Your Federal Chief Technology Officer delivers invaluable insight to guide you along your journey.

## ONLINE RESOURCES

CDW has the resources to increase your understanding of our services expertise and offerings. Prior to working with your services architect, we encourage you to invest some time reviewing a few resources, which can be accessed by visiting:

## PETER DUNN

Executive Technology Strategist – Federal Nationwide  
850.974.3172

[Peter.Dunn@cdw.com](mailto:Peter.Dunn@cdw.com)

## BACKGROUND & EXPERIENCE

Peter is an accomplished technology leader with over 20 years of experience in Cybersecurity, DevOps, and Data Center Management both in the offensive and defensive roles for Federal and private sector organizations. Before joining CDW, Peter was part of the Department of the Air Force (DAF) where he spent the last 5+ years working as the Director of Cyber Warfare Training Systems for the 39th Information Operations Squadron, Hurlburt Field Florida. He was responsible for developing Cybersecurity Solutions and kinetic based toolsets for operations in multi-facet cloud solutions. His ability to enhance partnerships with interagency, industry, and joint entities provided an increase in effectiveness and DoD-wide efficiency.

Today Peter is a Federal Chief Technology Officer covering all things Data Center, Cloud Solution Architecture, Cybersecurity, and DevOps. Currently, Peter is focusing on CDW-G initiatives that include:

- Enterprise Security Management Infrastructure (ESMI)
- Enterprise Virtual Training Cloud (EVMC)
- Enterprise Cross Domain Solutions & Zero Trust (ECDS)
