Rob Nolen currently serves as the Chief Technologist and is a Senior Principal Architect for US DoD at AWS. For the last five years, he's supported cloud efforts with all DoD components, helping mission owners realize goals around digital transformation, DevSecOps, and tactical edge. He brings a 20-year career with broad commercial industry perspective and background, covering DevOps, infrastructure architecture, and security. His focus as DoD Chief Technologist is driving Amazon offerings to better help mission owners realize their goals with cloud technology.
