Plans, Policy, and Logistics,
U.S. Transportation
Command**

USTRANSCOM

UNITED STATES TRANSPORTATION COMMAND

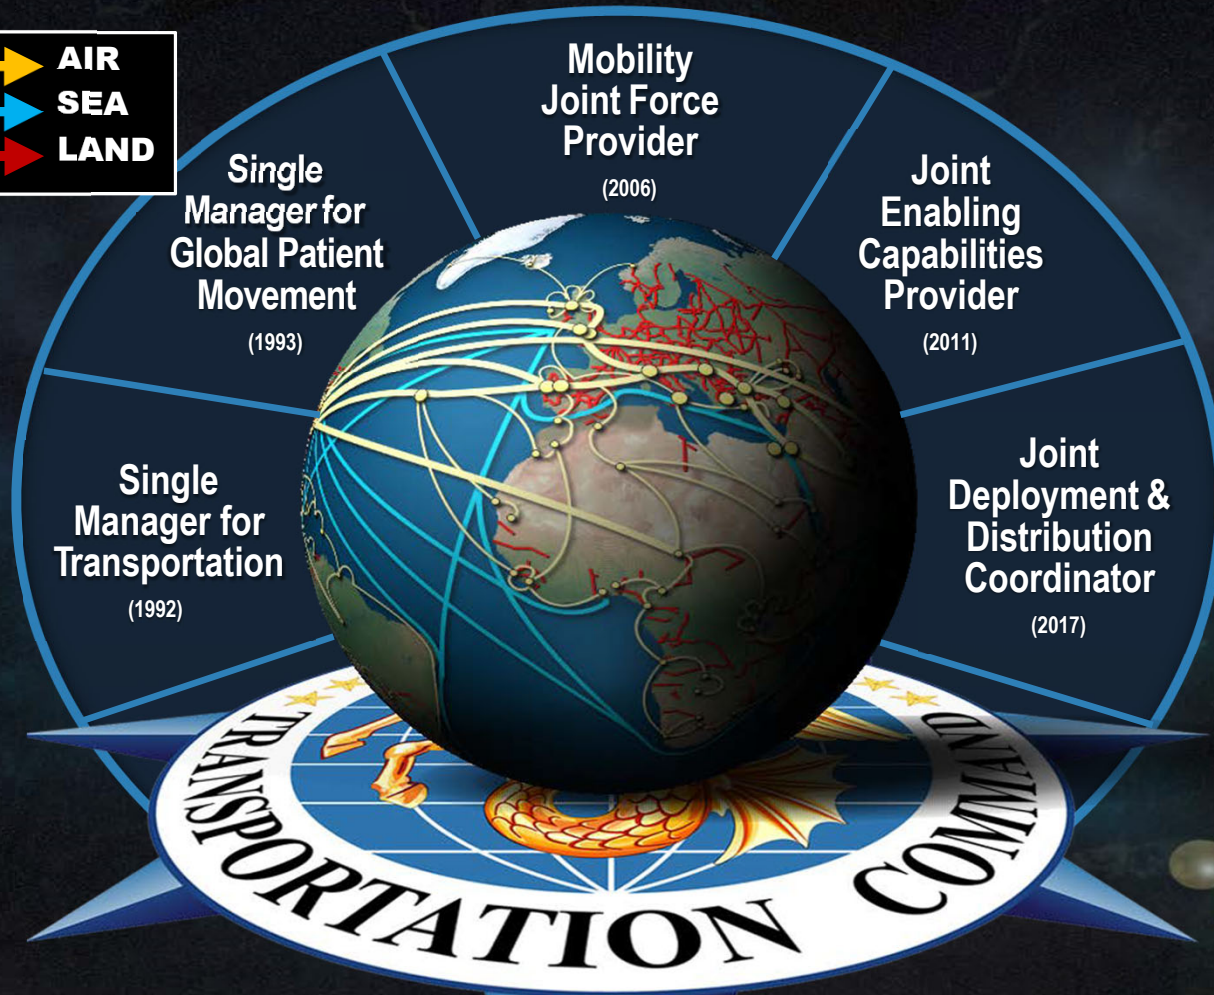

Agenda

- USTRANSCOM Introduction
- Journey to TMS
- OTA Process & Solution Delivery
- Q&A

THE GLOBAL DISTRIBUTION NETWORK (GDN)

TOGETHER, WE DELIVER.

GDN is a Multi-Dimensional Network of...

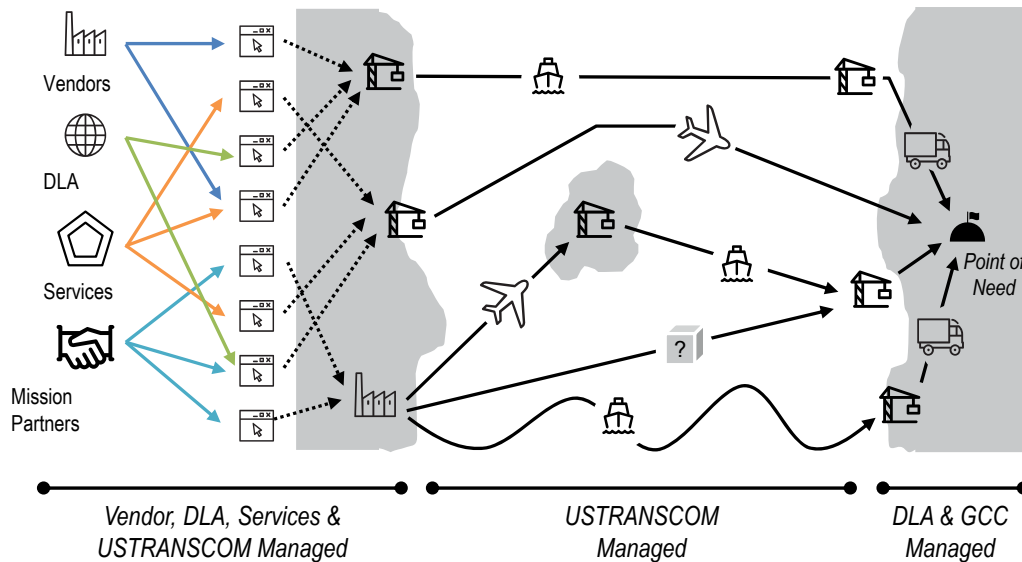

- **Routes**
 - Lines of Communication
- **Modes**
 - Air, Land, & Sea
- **Nodes**
 - Enroute Infrastructure
- **Providers**
 - Comm Industry / Services
- **Access**
 - Host Nation Agreements
- **Information Network**
 - IT, Comms
- **Distributed C2**
 - Globally Positioned

...that Provides the National Command Authorities with Global REACH in Support of US National Security Objectives.

Transportation Management System (TMS) Opportunity

Current State

The JDDE maintains 100+ mode- and service-specific transportation systems for planning, managing, and tracking cargo and personnel in the Defense Transportation System.

Integration challenges make it difficult to achieve an end-to-end view of movement requirements, available capacity, or related financial transactions.

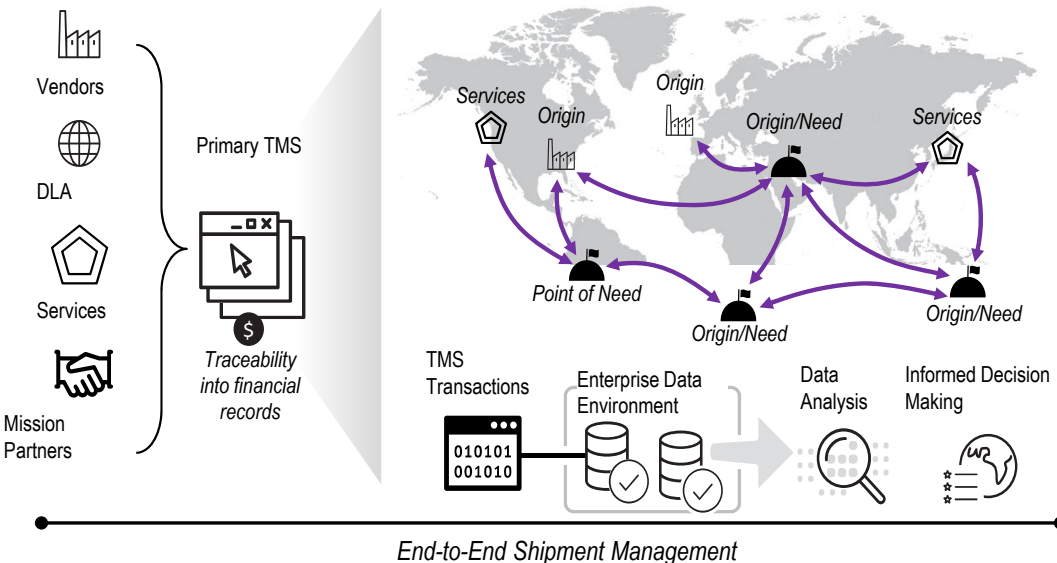

Transportation Management System (TMS) Opportunity

Potential Future State

The JDDE uses a primary system to integrate end-to-end transportation operations to deliver and sustain the Joint Force.

Through a TMS, USTRANSCOM connects to Service and Agency logistics systems, and provides a common platform to integrate GCC operations into the JDDE.

With global use of a standard product, a TMS provides comprehensive information for JDDE-related 'Big Data' efforts, enables audit readiness, and improves USTRANSCOM's ability to develop global mobility solutions.

PROTOTYPE 1.1 – 1.4

USTRANSCOM Journey with TMS – Part 2

Soren Hastrup, CEO Telesto Group LLC

October 18th 2018

The Project

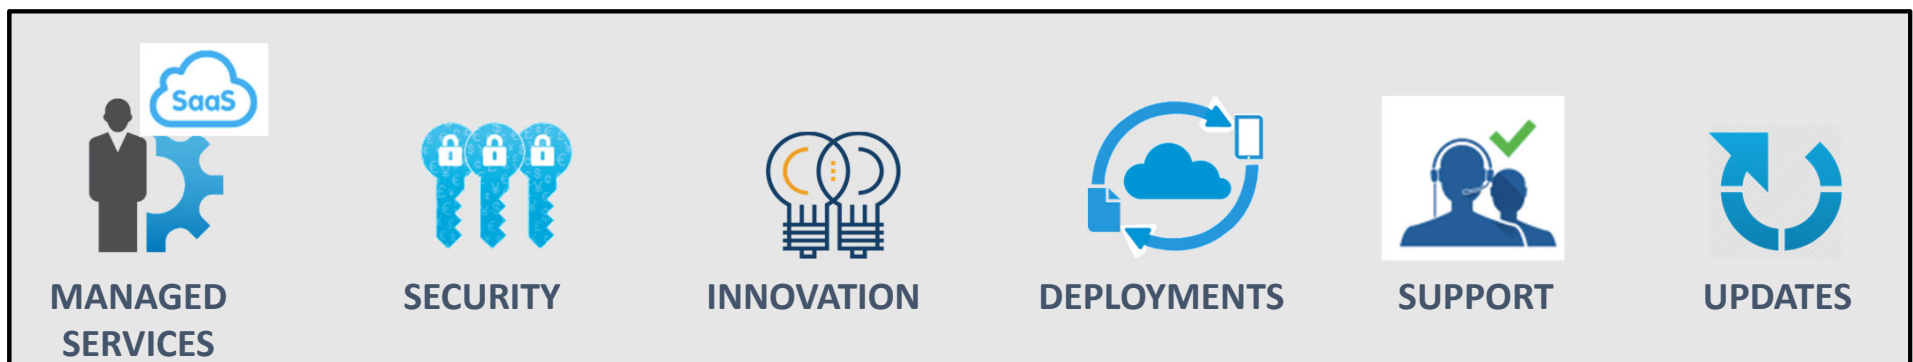

PROTOTYPE 1.1 – 1.4

Project Facts

- **OTA Acquisition (14 weeks)**
- **Global Operations w/ 55,000 Users**
- **10 Billion USD+/- in freight spend**
- **24/7 operations support**
- **72 legacy systems across 5 key process areas:
Plan, Order, Ship, Pay and Track**
- **Need for Audit compliance**

Key Challenges

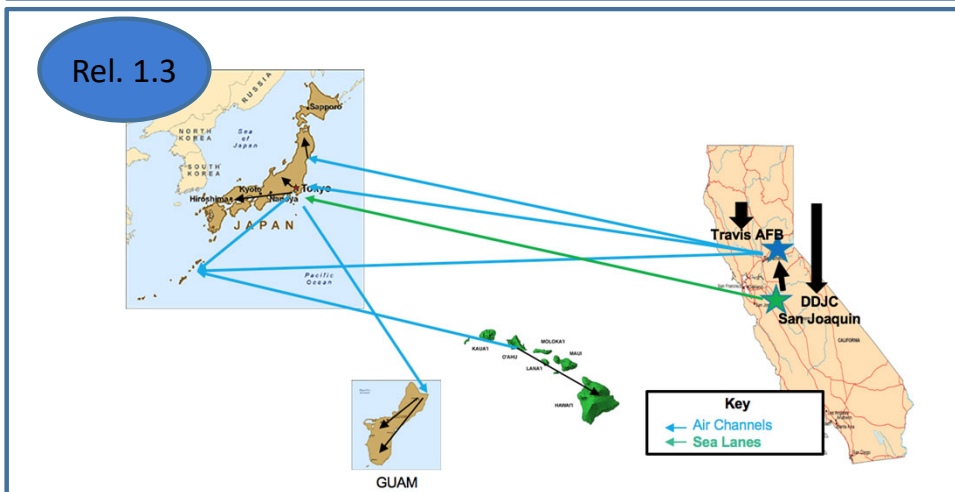

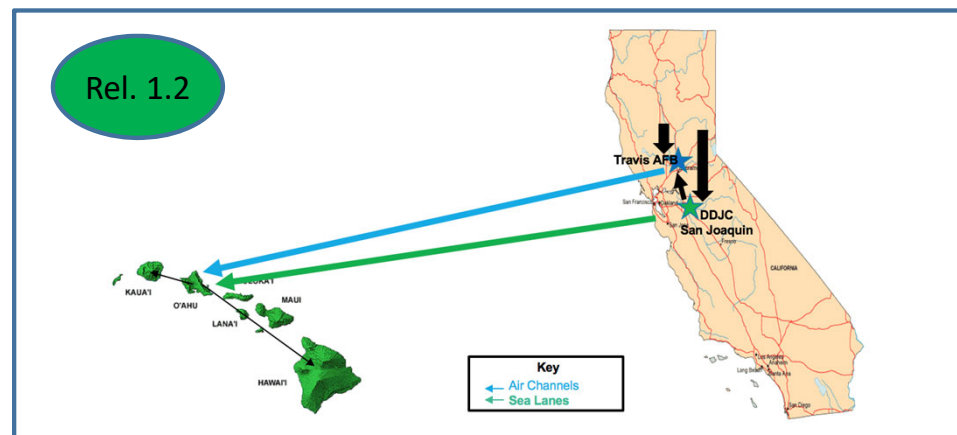

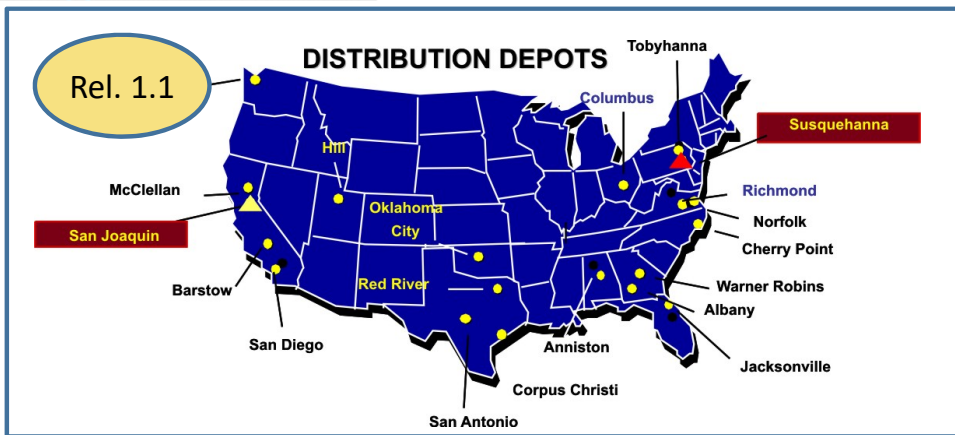

- **Providing global visibility to cargo**
- **Change Management**
- **Data management across DoD**
- **Carrier networks and current policies**
- **Engineering TM to function inside current DoD
and commercial legacy capability**
- **Moving fast while in control**
