

Scott Beliveau currently serves as Principal Innovation Architect and co-Lead Product Owner of the USPTO's Enterprise Data and Analytics product at the United States Patent and Trademark Office (USPTO). In these roles, Mr. Beliveau manages one of the world's largest data collections comprising over 200 years of innovation. Serving as the key advisor and visionary to all levels of USPTO leadership on emerging technology and architecture solutions, Scott spearheads public-private partnerships that empower entrepreneurs to capitalize on their imagination; oversees the development and operational use of AI/ML at the USPTO; and leads the delivery of new data products helping innovators secure their intellectual property rights.

Mr. Beliveau received his Bachelor of Science in Electrical Engineering from Brown University and his Masters of Business Administration from the University of Rhode Island. He lives in Alexandria Virginia, with his wife Rachel, his son Sam, and his loyal greyhound Fiona.
