

Scott is the Vice President of Federal Risk Markets at Neustar, Inc., and is responsible for developing data-driven solutions for governments in their fraud, waste and abuse prevention programs.

Prior to joining Neustar, Scott was the Director of Federal Market Strategy at LexisNexis Risk Solutions where he invented several identity-based products and holds patents in products that have stopped over \$500 million in government identity fraud. Scott was also employed at the Bureau of Fiscal Service (BFS), a bureau of the US Treasury where he drafted strategic plans for multiple business units, implemented industry best practices in the collection processes of delinquent debt owed to the federal government by creating an Analytics Division.

Scott holds a masters in finance and a graduate certificate in investments from the Carey Business School at Johns Hopkins University.
