

Sean Thompson has been at Red Hat for 11 years, where he now leads the solution architect team for Red Hat's Financial agency marketing. Mr. Thompson and his team are responsible for helping customers transform by adopting enterprise open source technologies.

He was formerly the lead solution architect supporting customers by helping them adopt cloud services, move workloads to the cloud, and guide them to automating at scale.

Prior to that he supported Red Hat's Federal OEM partners in Cisco, Dell, IBM, and HP. There he helped them understand and adopt Red Hat technologies into their architectures.

Prior Sean worked in the Red Hat Consulting's Global Solution & Strategy Office where he worked on standardizing consulting delivery, creating services products, assisting customers in Unix to Linux migrations. He was also responsible for the Global Enablement of new products.

During Mr. Thompson's prior experience at IBM he was a software developer and helped customers adopt middleware for 10 years. Lastly, Sean started his career at Microsoft where he did software testing for Microsoft Powerpoint.
